Chandra Moorthy

Full-stack engineer: the payments, permissions and AI behind multi-tenant SaaS

cmchandru77@gmail.com | Chennai, India
linkedin.com/in/chandra-moorthy-5a3156193 github.com/chandru-cm

SUMMARY

Software engineer with 2 years of experience building production multi-tenant SaaS platforms with Node.js, TypeScript and PostgreSQL, plus Angular, React, React Native and Firebase. Delivered REST APIs, role-based access control, payment workflows, financial reporting and generative AI features (Google Vertex AI, Gemini, Pinecone) across property management, community finance and education products. Open to relocation, visa sponsorship welcome.

EXPERIENCE

Full Stack Developer, Tamilarasi Technologies Pvt Ltd Oct 2024 to present
Chennai, India

- Build generative AI features on Google Vertex AI and Gemini, using Pinecone vector search for context-aware responses and WebSocket streaming to deliver them.
- Own features end to end across four production products: PostgreSQL and Firestore data models, Node.js and TypeScript APIs, Angular and React front ends, third-party integrations and deployment.
- Build the payment collection, role-based access control and financial reporting that the products depend on.
- Trace production defects through logs and code to the root cause, and validate each fix against existing business logic.

SELECTED PROJECTS

RentEasify Rental management SaaS
My part: Backend workflows for billing, leases and deposits, plus association finance and AI-written listings.

- Built API workflows for rent billing, property management, lease agreements and payment collection, including advance and security deposits and offline payment confirmation.
- Implemented role-specific workflows for owners, managers, tenants, applicants and association users.
- Contributed association finance features covering income, expenses, reports and member-level transactions.
- Integrated generative AI to produce property descriptions and rental content.

SociBooks Community association management SaaS
My part: Member administration, role-based access control, and financial reporting.

- Developed member administration, income and expense tracking, and community project-planning workflows.
- Implemented role-based access control separating committee administration from resident permissions.
- Developed financial reporting: bank statement reconciliation, year-to-date dashboards, statement downloads and member-level financial visibility.

committee.socibooks.com

DigiVCards.ai Digital visiting card SaaS
My part: Card sharing, lead tracking and analytics, AI content generation, and payments.

- Developed digital visiting card features for business identity sharing, lead tracking and engagement analytics.
- Contributed AI-based card content generation, shareable card workflows, payment processing and mobile-first experiences.

digivcards.ai

Kalaivani ERP School management platform
My part: React Native features for parents, teachers and drivers, including live bus tracking.

- Contributed to a multi-tenant school management platform serving multiple client institutions, with Firebase (Firestore) as the database.
- Developed React Native features for parents, teachers and drivers, including live bus tracking for parents.
- Contributed parent-teacher discussions and messaging, school-wide notifications, attendance and payment tracking, frontend modules, API integration and mobile app migration.

SKILLS

Daily, in production: TypeScript, Node.js, Express.js, PostgreSQL, Angular, React, React Native, Firebase
Used on real projects: Google Vertex AI, Gemini API, Pinecone, WebSockets, Docker, CI/CD
Familiar: Python, FastAPI, Next.js
What I build: Multi-tenant architecture, Role-based access control (RBAC), Payment integration, REST APIs

EDUCATION

Bachelor of Engineering (B.E.), Mechatronics Engineering 2017 to 2021
Nehru Institute of Engineering and Technology, Tamil Nadu, India CGPA 7.25 / 10
